

# SAFETY DATA SHEET

## 1. Identification

### Names

**Product name** : Vanish NapiSan Oxi Action Gold Multi-Power Gel  
**SDS no.** : D8373809 v1.0L  
**Formulation #** : FF3120287  
**Supplier** : AUSTRALIA  
Reckitt Benckiser (Australia) Pty Limited  
ABN: 17 003 274 655  
680 George Street, Sydney NSW 2000  
Tel: +61 (0)2 9857 2000

NEW ZEALAND  
RB (Hygiene Home) New Zealand Limited  
2 Fred Thomas Drive, Takapuna  
Auckland , New Zealand 0622  
Tel: +64 9 484 1400

**Poison Information contact:** : Australia - 13 11 26  
New Zealand - 0800 764 766 or 0800 POISON

### Uses

**Product use** : Fabric Treatment Consumer use

## 2. Hazard identification

**Classification of the substance or mixture** : SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1

### GHS label elements

**Hazard pictograms** :

**Signal word** : **DANGER**

**Hazard statements** : **Causes serious eye damage.**

### Precautionary statements

**General** : Keep out of reach of children.

**Prevention** : Wash hands thoroughly after handling.  
Wear eye protection. Do not get in eyes, on skin, or on clothing.

**Response** : IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER/doctor/[\*\*\*].  
IF SWALLOWED: Call a POISON CENTRE/doctor/[\*\*\*] if you feel unwell.

**Storage** : Not applicable.

**Disposal** : Not applicable.

### 3. Composition/information on ingredients

**Substance/mixture** : Mixture

| Ingredient name  | % (w/w) | CAS number |
|--|---------|------------|
| Alcohols, C12-18, ethoxylated                                | ≤10     | 68213-23-0 |
| Benzenesulfonic acid, C10-13-alkyl derivatives, sodium salts | ≤10     | 68411-30-3 |
| hydrogen peroxide solution                                   | ≤10     | 7722-84-1  |

**There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.**

**The total concentration of ingredients in this product, reported or not in this section, is 100%.**

**Occupational exposure limits, if available, are listed in Section 8.**

### 4. First-aid measures

#### Description of necessary first aid measures

- Eye contact** : Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.
- Inhalation** : Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
- Skin contact** : Get medical attention immediately. Call a poison center or physician. Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician. Wash clothing before reuse. Clean shoes thoroughly before reuse.
- Ingestion** : Get medical attention immediately. Call a poison center or physician. Wash out mouth with water. Remove dentures if any. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Chemical burns must be treated promptly by a physician. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

#### Most important symptoms/effects, acute and delayed

##### Potential acute health effects

- Eye contact** : Causes serious eye damage.
- Inhalation** : No known significant effects or critical hazards.
- Skin contact** : No known significant effects or critical hazards.
- Ingestion** : No known significant effects or critical hazards.

##### Over-exposure signs/symptoms

- Eye contact** : Adverse symptoms may include the following:  
pain  
watering  
redness

## 4. First-aid measures

- Inhalation** : No specific data.
- Skin contact** : Adverse symptoms may include the following:  
pain or irritation  
redness  
blistering may occur
- Ingestion** : Adverse symptoms may include the following:  
stomach pains

### Indication of immediate medical attention and special treatment needed, if necessary

- Notes to physician** : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
- Specific treatments** : No specific treatment.
- Protection of first-aiders** : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

See toxicological information (Section 11)

## 5. Fire-fighting measures

### Extinguishing media

- Suitable extinguishing media** : Use an extinguishing agent suitable for the surrounding fire.
- Unsuitable extinguishing media** : None known.

**Specific hazards arising from the chemical** : No specific fire or explosion hazard.

- Hazardous thermal decomposition products** : Decomposition products may include the following materials:  
carbon dioxide  
carbon monoxide

**Special protective actions for fire-fighters** : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

**Special protective equipment for fire-fighters** : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

**Hazchem code** : Not applicable

## 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

**For non-emergency personnel** : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

**For emergency responders** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

**Environmental precautions** : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

## 6. Accidental release measures

### Methods and material for containment and cleaning up

- Small spill** : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
- Large spill** : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment.

See Section 13 for additional waste treatment information.

## 7. Handling and storage

### Precautions for safe handling

- Protective measures** : Put on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
- Advice on general occupational hygiene** : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

- Conditions for safe storage, including any incompatibilities** : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. Storage temperature: daily average 30°C. Do not freeze.

## 8. Exposure controls/personal protection

### Control parameters

#### Australia

### Occupational exposure limits

| Ingredient name            | Exposure limits  |
|----------------------------|--|
| hydrogen peroxide solution | <b>Safe Work Australia (Australia, 12/2019).</b><br>TWA: 1.4 mg/m <sup>3</sup> 8 hours.<br>TWA: 1 ppm 8 hours. |

#### New Zealand

### Occupational exposure limits

## 8. Exposure controls/personal protection

| Ingredient name   | Exposure limits   |
|-------------------|---|
| hydrogen peroxide | <b>NZ HSWA 2015 - GRWM 2016 (New Zealand, 11/2020).</b><br>WES-TWA: 1 ppm 8 hours.<br>WES-TWA: 1.4 mg/m <sup>3</sup> 8 hours. |

- Appropriate engineering controls** : If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.
- Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
- Individual protection measures**
- Hygiene measures** : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
- Eye/face protection** : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.
- Skin protection**
- Hand protection** : EN 16523-1:2015  
 Tested for protection against chemical permeation.  
 Low chemical resistant or waterproof gloves.  
 (EN 16523-1:2015 supersedes EN 374-3:2003)  
 EN 374-2:2003  
 Tested for protection against liquid penetration and micro-organisms.  
 EN 388:2003  
 Tested for protection against mechanical risks (abrasion, blade cut resistance, tear resistance and puncture resistance).  
 ISO 374-1:2016/Type A  
 Protective glove with permeation resistance of at least 30 minutes each for at least 6 test chemicals.  
 ISO 374-1:2016/Type B  
 Protective glove with permeation resistance of at least 30 minutes each for at least 3 test chemicals.  
 ISO 374-1:2016/Type C  
 Protective glove with permeation resistance of at least 10 minutes for at least 1 test chemical.  
 Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties.  
 It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers.  
 In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
- Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
- Other skin protection** : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

## 8. Exposure controls/personal protection

**Respiratory protection** : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

## 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### Appearance

|  |   |
|--|---|
| <b>Physical state</b>  | : Liquid.   |
| <b>Colour</b>  | : Pink.   |
| <b>Odour</b>   | : Chemical. Floral.   |
| <b>Odour threshold</b>   | : Not available.  |
| <b>pH</b>  | : 4 to 5  |
| <b>Melting point/freezing point</b>                            | : Not available.  |
| <b>Boiling point, initial boiling point, and boiling range</b> | : Not available.  |
| <b>Flash point</b>   | : Not available.  |
| <b>Evaporation rate</b>  | : Not available.  |
| <b>Flammability</b>  | : Not available.  |
| <b>Lower and upper explosion limit/flammability limit</b>      | : Not applicable, considering single substances properties. |
| <b>Vapour pressure</b>   | : Not available.  |
| <b>Relative vapour density</b>                                 | : Not available.  |
| <b>Relative density</b>  | : Not available.  |
| <b>Density</b>   | : 1.012 to 1.052 g/cm <sup>3</sup> [20°C (68°F)]            |
| <b>Solubility(ies)</b>   | :   |

| Media      | Result         |
|------------|----------------|
| cold water | Easily soluble |
| hot water  | Easily soluble |

**Partition coefficient: n-octanol/water** : Not applicable, complex mixture including surfactants.

**Auto-ignition temperature** : Not available.

**Decomposition temperature** : Not available

**Viscosity** : Dynamic: 1000 to 2000 mPa·s (1000 to 2000 cP)

### Particle characteristics

**Median particle size** : Not applicable.

## 10. Stability and reactivity

**Reactivity** : No specific test data related to reactivity available for this product or its ingredients.

**Chemical stability** : The product is stable.

**Possibility of hazardous reactions** : Under normal conditions of storage and use, hazardous reactions will not occur.

**Conditions to avoid** : Do not mix with acids reducing agents chlorine-based bleaching agents  
Keep away from heat and direct sunlight. Store at temperatures not exceeding 60°C.

**Incompatible materials** : No specific data.

## 10. Stability and reactivity

**Hazardous decomposition products** : Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## 11. Toxicological information

### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name  | Result    | Species               | Dose                        | Exposure |
|--|-----------|-----------------------|-----------------------------|----------|
| Benzenesulfonic acid,<br>C10-13-alkyl derivatives,<br>sodium salts<br>hydrogen peroxide solution | LD50 Oral | Rat                   | 1080 mg/kg                  | -        |
|  | LD50 Oral | Rat - Male,<br>Female | 805 mg/kg (70%<br>H2O2 w/w) | -        |

**Conclusion/Summary** Based on available data, the classification criteria are not met.

#### Irritation/Corrosion

| Product/ingredient name  | Result   | Species          | Score  | Exposure                | Observation |
|--|--|------------------|--------|-------------------------|-------------|
| Alcohols, C12-18,<br>ethoxylated   | Eyes - Severe irritant                             | Rabbit           | -      | 100 mg                  | -           |
| Benzenesulfonic acid,<br>C10-13-alkyl derivatives,<br>sodium salts<br>hydrogen peroxide solution | Eyes - Severe irritant                             | In vivo          | -      | -                       | -           |

#### Conclusion/Summary

##### Skin

Based on available data, the classification criteria are not met.

##### Eyes

Calculation method Causes serious eye damage.

##### Respiratory

Based on available data, the classification criteria are not met.

#### Sensitisation

Not available.

#### Conclusion/Summary

##### Skin

Based on available data, the classification criteria are not met.

##### Respiratory

Based on available data, the classification criteria are not met.

#### Germ Cell Mutagenicity

Not available.

#### Conclusion/Summary

Based on available data, the classification criteria are not met.

#### Carcinogenicity

Not available.

#### Conclusion/Summary

Based on available data, the classification criteria are not met.

#### Reproductive toxicity

Not available.

#### Conclusion/Summary

Based on available data, the classification criteria are not met.

#### Teratogenicity

Not available.

#### Conclusion/Summary

Based on available data, the classification criteria are not met.

#### Specific target organ toxicity (single exposure)

| Name                       | Category   | Route of exposure | Target organs                |
|----------------------------|------------|-------------------|------------------------------|
| hydrogen peroxide solution | Category 3 | -                 | Respiratory tract irritation |

## 11. Toxicological information

### Specific target organ toxicity (repeated exposure)

Not available.

### Aspiration hazard

Not available.

**Information on likely routes of exposure** : Not available.

### Potential acute health effects

- Eye contact** : Causes serious eye damage.  
**Inhalation** : No known significant effects or critical hazards.  
**Skin contact** : No known significant effects or critical hazards.  
**Ingestion** : No known significant effects or critical hazards.

### Symptoms related to the physical, chemical and toxicological characteristics

- Eye contact** : Adverse symptoms may include the following:  
 pain  
 watering  
 redness
- Inhalation** : No specific data.
- Skin contact** : Adverse symptoms may include the following:  
 pain or irritation  
 redness  
 blistering may occur
- Ingestion** : Adverse symptoms may include the following:  
 stomach pains

### Delayed and immediate effects as well as chronic effects from short and long-term exposure

#### Short term exposure

- Potential immediate effects** : Not available.  
**Potential delayed effects** : Not available.
- Potential immediate effects** : Not available.  
**Potential delayed effects** : Not available.

#### Potential chronic health effects

Not available.

- Conclusion/Summary** : Based on available data, the classification criteria are not met.
- General** : No known significant effects or critical hazards.  
**Carcinogenicity** : No known significant effects or critical hazards.  
**Germ Cell Mutagenicity** : No known significant effects or critical hazards.  
**Teratogenicity** : No known significant effects or critical hazards.  
**Developmental effects** : No known significant effects or critical hazards.  
**Developmental effects** : No known significant effects or critical hazards.

### Numerical measures of toxicity

#### Acute toxicity estimates

Not available.

## 11. Toxicological information

## 12. Ecological information

### Toxicity

| Product/ingredient name   | Result                            | Species  | Exposure |
|---|-----------------------------------|--|----------|
| Benzenesulfonic acid, C10-13-alkyl derivatives, sodium salts hydrogen peroxide solution | Acute LC50 5 mg/l Fresh water     | Fish - Oncorhynchus mykiss - Juvenile (Fledgling, Hatchling, Weanling) | 96 hours |
|   | Acute EC50 1.2 mg/l Marine water  | Algae - Dunaliella tertiolecta - Exponential growth phase              | 72 hours |
|   | Acute EC50 2320 µg/l Fresh water  | Daphnia - Daphnia magna - Neonate                                      | 48 hours |
|   | Acute LC50 93 ppm Fresh water     | Fish - Oncorhynchus mykiss   | 96 hours |
|   | Chronic NOEC 100 mg/l Fresh water | Fish - Micropterus salmoides   | 28 days  |

**Conclusion/Summary** Based on available data, the classification criteria are not met.

### Persistence and degradability

**Conclusion/Summary** Based on available data, the classification criteria are not met.

| Product/ingredient name    | Aquatic half-life | Photolysis | Biodegradability |
|----------------------------|-------------------|------------|------------------|
| hydrogen peroxide solution | -                 | -          | Readily          |

### Bioaccumulative potential

| Product/ingredient name                                      | LogP <sub>ow</sub> | BCF   | Potential |
|--|--------------------|-------|-----------|
| Alcohols, C12-18, ethoxylated                                | 4.2                | 387.5 | low       |
| Benzenesulfonic acid, C10-13-alkyl derivatives, sodium salts | 3.32               | -     | low       |
| hydrogen peroxide solution                                   | -1.36              | -     | low       |

### Mobility in soil

**Soil/water partition coefficient (K<sub>oc</sub>)** : Not available.

**Other adverse effects** : No known significant effects or critical hazards.

## 13. Disposal considerations

### Disposal methods

The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## 14. Transport information

|                            | ADG            | ADR/RID        | IMDG           | IATA           |
|----------------------------|----------------|----------------|----------------|----------------|
| UN number                  | Not regulated. | Not regulated. | Not regulated. | Not regulated. |
| UN proper shipping name    | -              | -              | -              | -              |
| Transport hazard class(es) | -              | -              | -              | -              |
| Packing group              | -              | -              | -              | -              |
| Environmental hazards      | No.            | No.            | No.            | No.            |

**Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

**Transport in bulk according to IMO instruments** : Not available.

## 15. Regulatory information

### Standard for the Uniform Scheduling of Medicines and Poisons

Schedule 5 CAUTION

|  |  |
